

RGBColor

```
classDiagram
    class RGBColor
    class Leds
    Leds ..> RGBColor : m_ledColors
```

The diagram illustrates a class hierarchy where the `Leds` class inherits from the `RGBColor` class. This is represented by a dashed purple arrow pointing from the `Leds` box to the `RGBColor` box. The label `m_ledColors` is placed next to the arrow, indicating the specific method or attribute through which the inheritance is realized.
